

Hackathon Rules & Regulations

1. **Participation:** Individual (Solo) only.
2. **Originality & Integrity:** Participants must build the project completely during the hackathon. Pre-built projects, copied templates, paid UI kits, or third-party code used without a proper license are strictly prohibited.
3. **Hosting:** All source code must be hosted in a public GitHub repository.
4. **Open-Source & Commercial Contribution:** Participants will receive contributor credit. By submitting, participants grant Willovate the right to review, modify, reuse, and integrate submitted code, designs, and documentation into open-source or commercial projects.
5. **Intellectual Property Protection:** You are strictly prohibited from using the provided problem statement, project code, or core platform ideas anywhere else outside of this hackathon submission.

Smart Offer Slot Booking System

Objective

Build a fullstack web application where a business can create **limited-time offer slots**, and customers can reserve those offers through a public booking page.

This system should be useful for any service-based business like restaurant, gym, salon, clinic, coaching class, gaming zone, turf, spa, or activity center.

Mandatory Tech Stack

Frontend: React + TypeScript / TSX

Styling: Tailwind CSS

Backend: .NET 8 Web API

Database: PostgreSQL or SQL Server

API Documentation: Swagger / OpenAPI

Core Concept

A business can create offers for specific time slots.

Example:

Offer: Afternoon Gym Trial
Original Price: ₹499
Offer Price: ₹99
Date: 25 May 2026
Time: 3 PM - 5 PM
Available Seats: 20
Booking Limit: 1 per customer
Status: Active

Customers can open the public offer page and book the slot.

User Roles

1. Admin / Business Owner

Can create and manage offers, slots, bookings, and business profile.

2. Customer

Can view active offers and book a slot.

Required Features

A. Admin Login

Admin should be able to log in.

Minimum fields:

Email

Password

After login, the admin should see the dashboard.

B. Business Profile

Admin should be able to create/edit business profiles.

Fields:

Business Name
Business Type
Owner Name
Phone Number
Email
Address
City
Logo URL / Logo Upload optional
Opening Time
Closing Time

Business types:

Restaurant
Gym
Salon
Clinic
Coaching
Turf
Other

C. Offer Management

Admin should be able to create offers.

Offer fields:

Offer Title
Offer Description
Category
Original Price

Offer Price
Discount Percentage
Start Date
End Date
Start Time
End Time
Total Capacity
Max Booking Per Customer
Terms and Conditions
Status

Offer status:

Draft
Active
Paused
Expired
Cancelled

Example offers:

Lunch Hour Deal
Gym Trial Slot
Salon Happy Hour
Doctor Consultation Discount
Turf Morning Slot Offer
Coaching Demo Class

D. Slot Management

Each offer should have one or more slots.

Slot fields:

Offer ID
Slot Date
Start Time
End Time
Capacity
Booked Count
Available Count

Status

Slot status:

Available

Full

Closed

Expired

Cancelled

Example:

Offer: Gym Trial

Slot 1: 10 AM - 11 AM, Capacity 10

Slot 2: 5 PM - 6 PM, Capacity 15

E. Public Offer Listing Page

Customers should be able to see all active offers.

Required filters:

Business Type

Category

Date

Price Range

Available Only

Each offer card should show:

Offer Title

Business Name

Original Price

Offer Price

Discount

Available Slots

Expiry Timer

Book Now Button

F. Public Offer Detail Page

Customer should see full offer details.

Show:

Business Name

Offer Title

Description

Price

Discount

Available Slots

Terms

Location

Book Slot Button

G. Booking Flow

Customer should be able to book an offer slot.

Booking form fields:

Customer Name

Phone Number

Email optional

Selected Slot

Number of People

Special Note optional

System should validate:

Slot is active

Slot is not full

Number of people does not exceed available capacity

Same phone number should not exceed max booking limit

Expired offers cannot be booked

After booking, show confirmation page.

Confirmation should show:

Booking Reference Number
Offer Name
Business Name
Slot Date and Time
Customer Name
Booking Status

Booking Status

Pending
Confirmed
Cancelled
Completed
No Show

Admin should be able to update booking status.

Admin Dashboard Requirements

Dashboard should show:

Total Offers
Active Offers
Total Bookings
Today's Bookings
Total Capacity
Booked Seats
Available Seats
Conversion Rate

Also show recent bookings table:

Customer Name
Offer Name
Slot Time
People Count

Booking Status
Action

Minimum Screens Required

Participants must build at least these screens:

1. Admin Login Page
2. Admin Dashboard
3. Create Offer Page
4. Manage Offers Page
5. Manage Bookings Page
6. Public Offer Listing Page
7. Public Offer Detail Page
8. Booking Confirmation Page

For 34 hours, at least **5 screens must be fully working**.

Required APIs

POST /api/auth/login

POST /api/business

GET /api/business

PUT /api/business/{id}

POST /api/offers

GET /api/offers

GET /api/offers/{id}

PUT /api/offers/{id}

DELETE /api/offers/{id}

POST /api/slots

GET /api/slots

GET /api/offers/{offerId}/slots

PUT /api/slots/{id}

DELETE /api/slots/{id}

POST /api/bookings
GET /api/bookings
GET /api/bookings/{id}
PUT /api/bookings/{id}/status

GET /api/dashboard/summary

Business Rules

Offer price must be less than original price.
Offer cannot be booked after expiry date.
Slot cannot be booked if capacity is full.
Booked count should increase after booking.
Booking reference should be unique.
Admin can pause or cancel an offer.
Cancelled/expired offers should not appear on public page.

Bonus Features

Teams can add bonus features for extra marks:

QR code for each offer
Countdown timer for offer expiry
Waitlist when slot is full
Mock email/SMS/WhatsApp notification log
Calendar view for slots
Coupon code support
Dark/light mode
Export bookings as CSV
Payment status field
Customer cancellation link
Responsive mobile UI

Judging Criteria

Criteria	Marks
UI/UX and responsiveness	25
Backend API quality	20

Database design	15
Business logic implementation	15
Code quality and folder structure	10
Bonus features	5
Demo and documentation	10
Total	100

Submission Requirements

Each team must submit:

GitHub repository link
README with setup steps
Frontend screenshots
Swagger screenshot
Database schema or ER diagram
Demo video of 2–3 minutes
.env.example file

Important Hackathon Rule

Participants must build the project during the hackathon. Pre-built projects, copied templates, paid UI kits, or copied third-party code without license are not allowed.

Participants will receive contributor credit. By submitting, participants allow Willovate to review, modify, reuse, and integrate submitted code, designs, and documentation into open-source or commercial projects.
